Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Non-Final Rejection

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/28/04 has been entered.

Claims 1, 2, and 5 are pending.

Applicants' traversal, the amendment to claims 1 and 2, and the amendment to the abstract filed on 9/28/04 is acknowledged and considered.

Claim Objections

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

In view of the amendment to claim 1, the rejection of claims 1 and 2 under 102(b) as being anticipated by Pfeifer et al. (office action mailed on 6/2/03) is reinstated because the amendment to claim 1 and the term "or" on line 2 of claim 1 does not limit the enzyme activity of the cell culture to CYP1A1, CYP1A2, and CYP3A.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Pfeifer et al. (PNAS, Vol. 90, pages 5123-5127, cited on a previous PTO-892).

Pfeifer anticipates the immortalized human cell line. Pfeifer teaches immortalized human liver cells that express hepatocyte characteristics (abstract). The liver cells expressed CYP1A1/1A2, epoxide hydrolase, NADPH CYP reductase, SOD, catalase, glutathione S-transferase, and glutathione peroxidase (pages 5126-5127).

Applicant's arguments filed 10/28/03 have been fully considered but they are not persuasive because the claims do not require that the cells in the culture express CYP1A1, CYP1A2, and CYP3A. This feature is the second alternative. The first alternative requires only that the cells retain an enzyme activity involved in metabolism of xenobiotics.

Conclusion

The statement in the applicants' response requesting that the examiner consider the recently issue patent 6,756,229 (US application 10/009,158) is moot because the US patent is not listed on an information disclosure statement (PTO-1449).
